

CMPEN 497 Lab 4 Hongshuo Wang

1. the left prisms are driving. The rest of prisms are following in the motion

2. The point between ^{right} ~~left~~ rod and bottom rod

3. All the points

4. The bottom two points

5. 1 to degree of freedom

since we can create a coordinate at left bottom point and rotate in 360° in Z axis.

Other rods are constrained by each other.
